Ministry of Industry

List of State-Owned Factories

Sr. No.	Factory Name	Sr. No.	Factory Name
1	Steel Mill (Myingyan)	29	Cotton Ginning Factory (Pyay)
2	Steel Mill (Pang Pet)	30	Cotton Ginning Factory (Sagaing)
3	Tyre Factory (Thaton)	31	Cotton Ginning Factory (Kanthagyi)
4	Rubber Products Factory (Thingangyun)	32	Cotton Ginning Factory (Minhla)
5	Solar Factory (South Dagon)	33	Cotton Ginning Factory (Salin)
6	LED Factory (Hlaing)	34	Cotton Ginning Factory (Taungdwingyi)
7	Cement Factory (Thayet)	35	Cotton Ginning Factory (Shauktaw)
8	Cement Factory (Kyangin)	36	Cotton Ginning Factory (Kyaukpadaung)
9	Asbestos Cement Sheet Factory (Hmawbi)	37	Cotton Ginning Factory (Myinmu)
10	Glass Factory (Pathein)	38	Cotton Ginning Factory (Pale)
11	Plastic Factory (Kyaukse)	39	Cotton Ginning Factory (Natogyi)
12	Refractory Brick Factory (Kyaukse)	40	Cotton Ginning Factory (Taungtha)
13	Spinning, Weaving and Finishing Factory (Shwedaung)	41	Cotton Ginning Factory (Myingyan)
14	Spinning and Weaving Factory (Sagaing)	42	Cotton Ginning Factory (Mahlaing)
15	Garment Factory (Sagaing)	43	Cotton Ginning Factory (Pyawbwe)
16	Spinning and Weaving Factory (Pwintphyu)	44	Cotton Ginning Factory (Yamethin)
17	Spinning and Weaving Factory (Pakokku)	45	Pharmaceutical Factory (Insein)
18	Spinning, Weaving and Garment Factory (Salingyi)	46	Pharmaceutical Factory (Inyang)
19	Spinning Factory (Myittha)	47	Hepatitis B Vaccine Plant (YwarTharGyi)
20	Spinning and Weaving Factory (Wundwin)	48	Pharmaceutical Ingredient Factory (Hmawbi)
21	Spinning Factory (Pyawbwe)	49	Tapioca Starch Factory (Daik-U)
22	Weaving, Finishing and Garment Factory (Yamethin)	50	Beleric Myrobalan Oil Factory (Seikphyu)
23	Knitting and Garment Factory (Taungtha)	51	Purified Drinking Water Factory (Kyaukse)
24	Weaving, Dyeing and Printing Factory (Myingyan)	52	Horses and Sheep Breeding Farm (Heho)
25	High-Grade Paper Mill (Thabaung)	53	Thaton Industrial Park
26	Newsprint Paper Mill (Thabaung)	54	Horses and Sheep Breeding Farm (Pwintphyu)
27	Home Utilities Factory (Minsu)	55	Horses and Sheep Breeding Farm (Yanpae)
28	Hydrogen Peroxide Factory (Chauk)		

Ministry of Industry

Location of State-Owned Factories

0 70 140 280 Kilometers

Steel Mill (Myingyan)

1

Location	Sar Khar Village, Myingyan Township, Mandalay Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	The factory was established with the cooperation of Danieli Company (utilizing Italian technology) in order to produce steel billet and steel slabs. Phase I of the installation of equipment was completed in 2010. The equipment purchased for subsequent phases is stored at the site.

Key Assets

Land Area	795 acres
Machines/Capacity	<p>Integrated Steel Mill</p> <ul style="list-style-type: none"> Melt shop Plant-I (200,000 Tons/year) Melt shop Plant-II (200,000 Tons/year) Direct Reduction Plant (450,000 Tons/year) Hot Strip Mill (200,000 Tons/year) Cold Mill (150,000 Tons/year) Galvanizing Line (150,000 Tons/year) Slitting Line (70,000 Tons/year) Profile & Forming Line (20,000 Tons/year) Color Coating Line (20,000 Tons/year) Section Mill (380,000 Tons/year) Rail Mill (300,000 Tons/year) Pipe Mill (130,000 Tons/year)
No. of Buildings	84 (including 18 industrial buildings)
No. of Employees	354
Products	Steel Billet, Steel Slab, Direct Reduction Iron, Hot Rolled Steel Coil, Hot Rolled Steel Sheet, Cold Rolled Steel Coil, Galvanized & Al-Zinc Coated Steel Coil, Colour Coated Steel Coil, Slit Coil, Profile & Formed Section Steel Sheet, Steel Section & Round and Steel Rail

Infrastructure

Electricity	<ul style="list-style-type: none"> • 230 kV line from the Thapyaywa Main Station and Sembcorp Power Plant • Transformers: 85 MVA (4) units
Natural Gas	Connected with Ø 10" Gas Pipeline from Shwe Offshore Gas Pipeline
Water Resource	Ø 10" tube well (10) Units and Ø 4" tube well (1) unit
Transportation	Close to the Yangon-Myingyan Highway, Thazi-Myingyan Railway and the Ayeyarwaddy River.

- ✓ The factory is an integrated steel mill, purchased from and partially installed by Danieli Company, Italy.
- ✓ The property offers convenient access to Mandalay, the economic center of Upper Myanmar and one of the major cities with facilities to collect scrap metal from vehicles which can be used in steel manufacturing.
- ✓ The property also enjoys easy access to the region's infrastructure, including the Lethtoke and Simeekhone Jetties located on the Ayeyarwaddy River, major arterial roads and the Thazi-Myingyan-Nyaung U Railway.
- ✓ There is a market opportunity for the steel mill as the growing Myanmar economy is giving rise to significant increases in construction, and therefore rising demand for steel. In the domestic market, there is a significant gap between the levels of steel production and demand.

Steel Mill (Pang Pet)

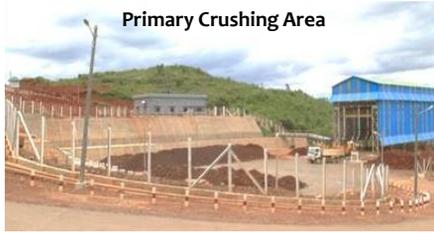

Location	Taunggyi Township, Southern Shan State, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	The steel mill is almost fully constructed with equipment utilizing Romelt technology. The raw materials used in the plant are readily available from nearby sources.

Down Hill Conveyor

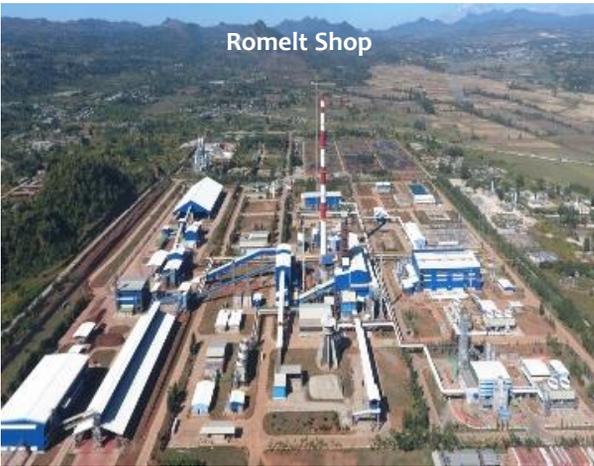

Primary Crushing Area

Secondary Crushing Area

Romelt Shop

Key Assets

Land Area	5122.16 acres
Machines/Capacity	Romelt Plant (Russian Technology) (Pig Iron – 200,000 Tons/ year)
No. of Buildings	114 (including 28 industrial buildings)
No. of Employees	248
Products	Pig Iron

Infrastructure

Electricity	<ul style="list-style-type: none"> 132 kV line from the Kalaw Substation Transformers: 40MVA (2) units
Natural Gas	Connected to the Pyinyaung Substation (Shwe Offshore Gas Pipeline)
Water Resource	Supply from the Nantafat Creek
Transformation	Close to the Meiktila-Taunggyi-Tachileik Union Highway

Filter Water Tank

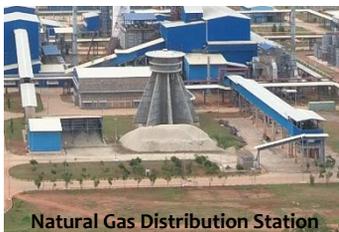

Air Compressor Station

Air Separation Unit

Natural Gas Distribution Station

- ✓ The factory has access to the necessary raw materials. Permits from the Myanmar Government are available for access to mineral deposits of 10.7 million tons of hematite (with Fe 56.4 %), 59.3 million tons of limonite (with Fe 42.6 %) and other mineral inputs (such as lime, dolomite, coal and silica sand).
- ✓ The property could produce energy from its heat recovery power station (which has an installed capacity of 40 MW) and export any surplus electric power to the national grid.
- ✓ The mill is part of an efficient supply chain due to its location close to the Meiktila-Taunggyi-Tachileik Union Highway.
- ✓ There is a market opportunity for the steel mill as the growing Myanmar economy is giving rise to significant increases in construction, and therefore rising demand for steel. In the domestic market, there is a significant gap between the levels of steel production and demand.

Highway

Railway

Township

Location	Thaton Township, Mon State, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	The factory was established under a Cooperation Agreement between the Czech and Myanmar Governments to produce bias tyre, utilizing Czech technology. Commercial operation commenced in 1985.

Key Assets

Land Area	1056.37 acres (including factory area of 40 acres)
Machines/Capacity	Bias tyres - 150,000 units/year Machines are ready to operate without major repair
No. of Buildings	283
No. of Employees	319
Products	Varieties of Bias Tyre (passenger tyres, light truck tyres, heavy truck tyres and agricultural tyres)

Infrastructure

Electricity	<ul style="list-style-type: none"> 6.6 kV line from the Thaton Substation Transformers: 1000 kVA (24) units
Steam	1.5 MPa, (15 ~ 20) Tons/hour from the Thaton Substation
Water Resource	Supply from the Domthami Stream
Transportation	Close to the Asian Highway 1 (AH-1)

- ✓ The factory has access to an abundant supply of natural rubber due to its location at the center of rubber plantation areas in Myanmar – Mon State, Bago Region and Tanintharyi Region.
- ✓ The location of the factory along the Yangon-Myawaddy Highway and near Myawaddy (the Myanmar-Thailand Border Trade Area) contributes to supply chain efficiency and access to customer markets.
- ✓ Skilled and experienced local workers are readily available in the area.
- ✓ Essential utilities (electricity, steam and water) are integrated into the manufacturing process.

0 230 460 920 Kilometers

Legend

-  Tyre Factory (Thaton)
-  Industrial Zone
-  Airport
-  Highway
-  Railway
-  Township

Location	No. 286, Natsin Pyon Street, Za Taung Ward, Thingangyun Township, Yangon Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	Commercial operation commenced in 1968. As the factory is located in a residential area, it may be suitable for other commercial or residential purposes.

Key Assets

Land Area	1.562 acres
No. of Buildings	13
No. of Employees	109
Products	Variety of forming rubber, such as Rubber Fender (Big), Cap for Belt, Coupling, Rubber Wheel, Rubber Ball, Star Coupling, Rubber Connector, Valve Seal and Sealing Cap T-206

Infrastructure

Electricity	Connected to the Yangon Electricity Supply Corporation (YESC), Thuwanna Substation
Fuel Oil	Myanma Petrochemical Enterprise (MPE), No. 1 Oil Refinery Factory (Thanlyin)
Water Resource	Ø 4" tube well , Ø 2" tube well Ø 1" water pipe supply by Yangon City Development Committee (YCDC)

Key Features

- ✓ It is potentially suitable for other commercial or residential purposes as it is located in the middle of an attractive residential and commercial area in Yangon, with adequate utilities (such as electricity and water supply).
- ✓ It is situated in a strategic location, about 9 km from Shwedagon Pagoda, 11 km from Sule Pagoda and the City Hall and 14 km from Yangon International Airport, giving it easy access to all of Yangon.

-  Township

0 3.75 7.5 15 Kilometers

Location	No. 476, Moegoke Street, 23 Ward, Industrial Zone 1, South Dagon, Yangon Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	Commercial production commenced in 2011. Although the factory has older technology, the land has a good location, and could be used for other commercial purposes.

Key Assets

Land Area	6.927 acres
Machines/ Capacity	Solar Panel Line (6 MW/year)
No. of Buildings	16 (including 9 industrial buildings)
No. of Employees	79
Products	Solar Panels

Infrastructure

Electricity	<ul style="list-style-type: none"> Connected to Myanma Electricity Supply Enterprise (ESE) Transformers: 300 kVA (2) units
Water Resource	Ø 2" pipeline from South Dagon Industrial Zone Water Supply

Key Features

The factory is potentially suitable for other commercial purposes as:

- ✓ it is located in the middle of a popular industrial zone (Industrial Zone 1 - South Dagon, Yangon);
- ✓ it has easy access to all of Yangon through the Thuwanna-South Dagon new bridge; and
- ✓ it has access to infrastructure (land about 7 acres and 16 buildings) and utilities (electricity with its own transformers and water supply).

 -  Township
- 

Location	Thayet Township, Magway Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	The factory was established in 1937 as the very first cement factory in Myanmar, utilizing Danish technology. Products were distributed under the brand name “Horse Head”, a well-known brand in Myanmar.

Key Assets

Land Area	209.71 acres (including factory area of 32.28 acres)
Machines/Capacity	Operating in wet process Kiln - 400 Tons/day (2 lines) Kiln 300 Tons/day (1 line) Machines have been regularly maintained and can be used without major repair.
No. of Buildings	168 (including 47 industrial buildings)
No. of Employees	523 Including: M.E (2), B.E/B.Tech (6), Certified Technicians (30)
Products	Ordinary Portland Cement, Oil-Well Cement

Infrastructure

Electricity	<ul style="list-style-type: none"> 66 kV line from the Taungdwin Substation Transformers: 9 MVA (2) units
Steam	Connected to Yadana gas Offshore (MOGE) with Ø 6" Gas Pipeline
Water Resource	Supply from the Ayeyarwaddy River
Transportation	Close to the Thayet-Minhla-Minbu Railway, Thayet-Kanma Railway, Mandalay-Aunglan-Pyay-Yangon Highway and Aunglan-Magway Road

- ✓ In line with the growth in Myanmar's construction industry, the cement sector has high growth potential in Myanmar.
- ✓ The factory has access to the necessary raw materials – hematite from Aunglan, Pyay and Sin Paung Wal Townships and gypsum from Hsibaw, Shan State. A limestone mine is connected to the factory via a Ropeway/Sky Cable of approximately 3.6 km.
- ✓ Raw yard and accessories, cement silos and jetty with conveyor lines are available at the factory.
- ✓ The factory's land area of more than 200 acres adjoins a Railway, roads and the Ayeyarwaddy River.
- ✓ Skilled and experienced local workers are readily available in the area.
- ✓ It has access to infrastructure (land and buildings) and utilities (electricity and water).

Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	The factory was established in 1970 utilizing Japanese technology. Products were distributed under the brand name “Horse Head”, a well-known brand in Myanmar.

Key Assets

Land Area	727.378 acres (including factory area of 145.45 acres)
Machines/Capacity	Operating in wet process Kiln 400 Tons/day (4 lines) Cement 360,000 Tons/year Machines have been regularly maintained and can be used without major repair.
No. of Buildings	270 (including 83 industrial buildings)
No. of Employees	705 Including: B.E/B.Tech (11), Certified Technicians (63)
Products	Ordinary Portland Cement (OPC), Rapid Hardening Portland Cement (RHPC)

Infrastructure

Electricity	<ul style="list-style-type: none"> 66 kV line from the Myanaung Substation Transformers: 9 MVA (3) units
Steam	Connected with Ø 10" Gas Pipeline to Yadana gas Offshore (MOGE)
Water Resource	Supply from the Ayeyarwaddy River
Transportation	Close to the Pathien-Hinthada-Kyangin Railway, the Ayeyarwaddy River, Pathein-Monywa Highway and Kyangin-Yangon Highway

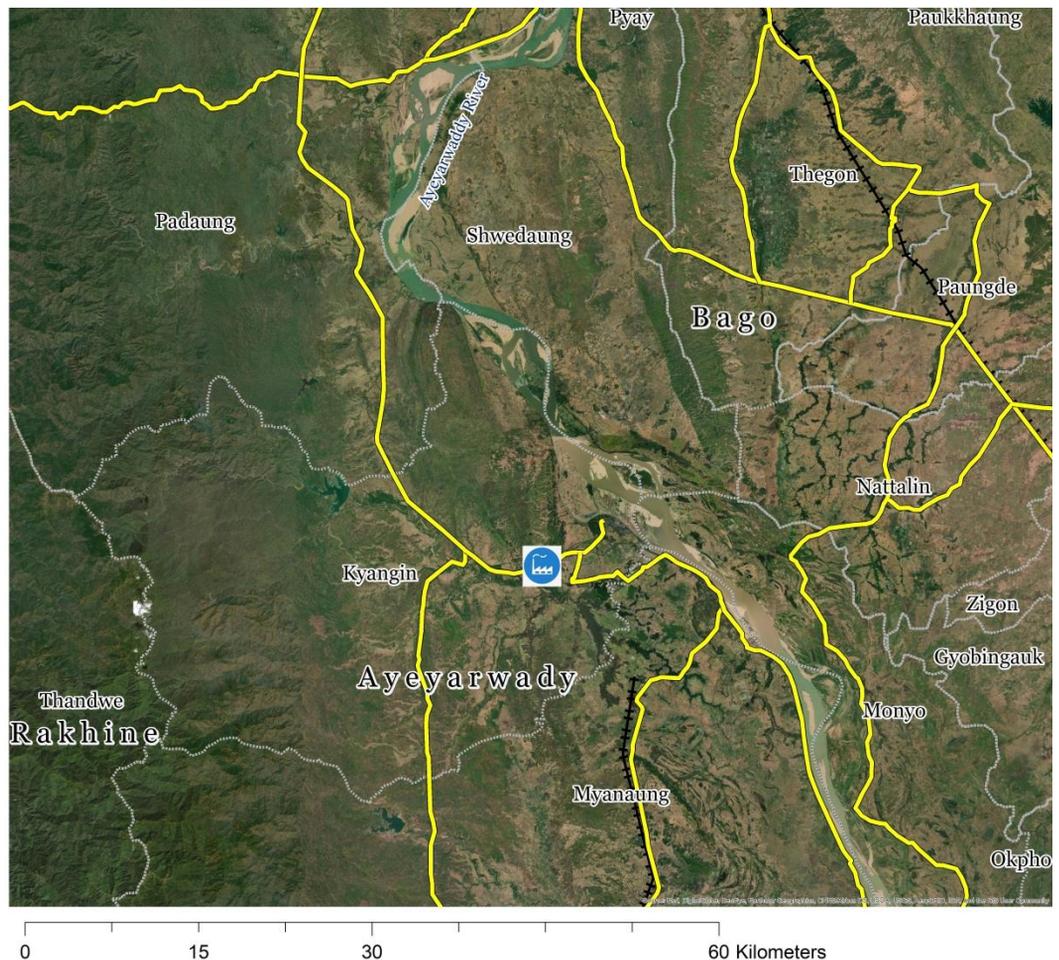

- ✓ In line with the growth in Myanmar's construction industry, the cement sector has high growth potential in Myanmar.
- ✓ Availability of raw materials: close to a limestone quarry (about 32 million tons) and Natmetaung limestone quarry (about 10 million tons), as a reserve, and laterite from Thantaung (about 4.86 million tons).
- ✓ Equipped with efficient logistics facilities (such as raw yard and accessories, cement silos, loading jetty with conveyor lines and electric locomotive to transport the raw material to the factory).
- ✓ Skilled and experienced local workers are readily available in the area.
- ✓ It has access to infrastructure (land and buildings) and utilities (electricity and water).
- ✓ The factory is well connected by means of railway, roads and the Ayeyarwaddy River, especially to Rakhine State, Ayeyarwaddy Region and Bago (west) Region.

-  Industrial Zone
-  Airport
-  Highway
-  Railway
-  Township

Location	Pathein Township, Ayeyarwaddy Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	The factory was established in 1980 to produce glass sheet utilizing Japanese technology. The factory uses high quality sand (with a consistent content of SiO ₂) from Ale-man Island (Ale-man Kyun).

Key Assets

Land Area	678.5 acres (including factory area of 195.43 acres)
Machines/Capacity	Furnace 30 Tons/day (Japanese technology) Clear glass 9600 Tons/year
No. of Buildings	140 (including 11 industrial buildings)
No. of Employees	245
Products	Clear Glass

Infrastructure

Electricity	<ul style="list-style-type: none"> 66 kV line from the Kankone Substation Transformers: 750 kVA (1) unit, 500 kVA (2) units, 300 kVA (3) units, 150 kVA (2) units
Water Resource	Supply from the Ngawun River
Transportation	Close to the Pathein-Yangon Highway and the Ngawun River

Key Features

- ✓ The factory is approximately 10 km away from Pathein which is located at the center of the Ayeyarwaddy Delta.
- ✓ The factory can easily access the international waterway as it located at the east bank of the Ngawun River and about 226 km away from Thilawa international port, Yangon and about 600 km away from Kyaukphyu Deep Sea Port, Rakhine State.
- ✓ The high quality sand is available from Ale-man Island (Ale-man Kyun), approximately 502 nautical miles away from the factory.
- ✓ It has access to infrastructure (land and buildings) and utilities (electricity and water).

-  Township

Location	Shwedaung Township, Bago Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	The spinning and weaving production commenced in 1982 with technology from China National Complete Plant Export Corporation (CNCPEC). The finishing plant was implemented by Total Textile International Ltd. (UK) in 1990. The spinning, weaving and finishing processes were integrated in 1991. The factory has been regularly maintained and the machines can be used for production without major repair.

Key Assets

Land Area	643.9 acres (including factory area of 149.84 acres and Specialized Textile & Garment Zone Area 127.06 acres)
Machines/Capacity	Spinning Machines (1,264,000 lbs/year) Weaving Machines (2,649,000 yards/year) Finishing Machines (4,320,000 yards/year)
No. of Buildings	246 (including 27 industrial buildings and 25 warehouses)
No. of Employees	1169 (including 104 persons attached)
Products	1/7 ~ 1/40 100 % Cotton, Grey Fabrics, Dyed and Printed Fabrics

Infrastructure

Electricity	<ul style="list-style-type: none"> 66 kV line from the Shwedaung Substation Transformers: 10 MVA (1) unit, 1000 kVA (8) units, 750 kVA (1) unit, 300 kVA (4) units,
Natural Gas for Boiler	Connected with Ø 4" pipeline from the Shwedaung Substation (Yadana gas offshore)
Water Resource	Supply from the Ayeyarwaddy River
Transportation	Collocated next to the Yangon-Pyay-Mandalay Highway, close to the Yangon-Pyay Railway and the Ayeyarwaddy River

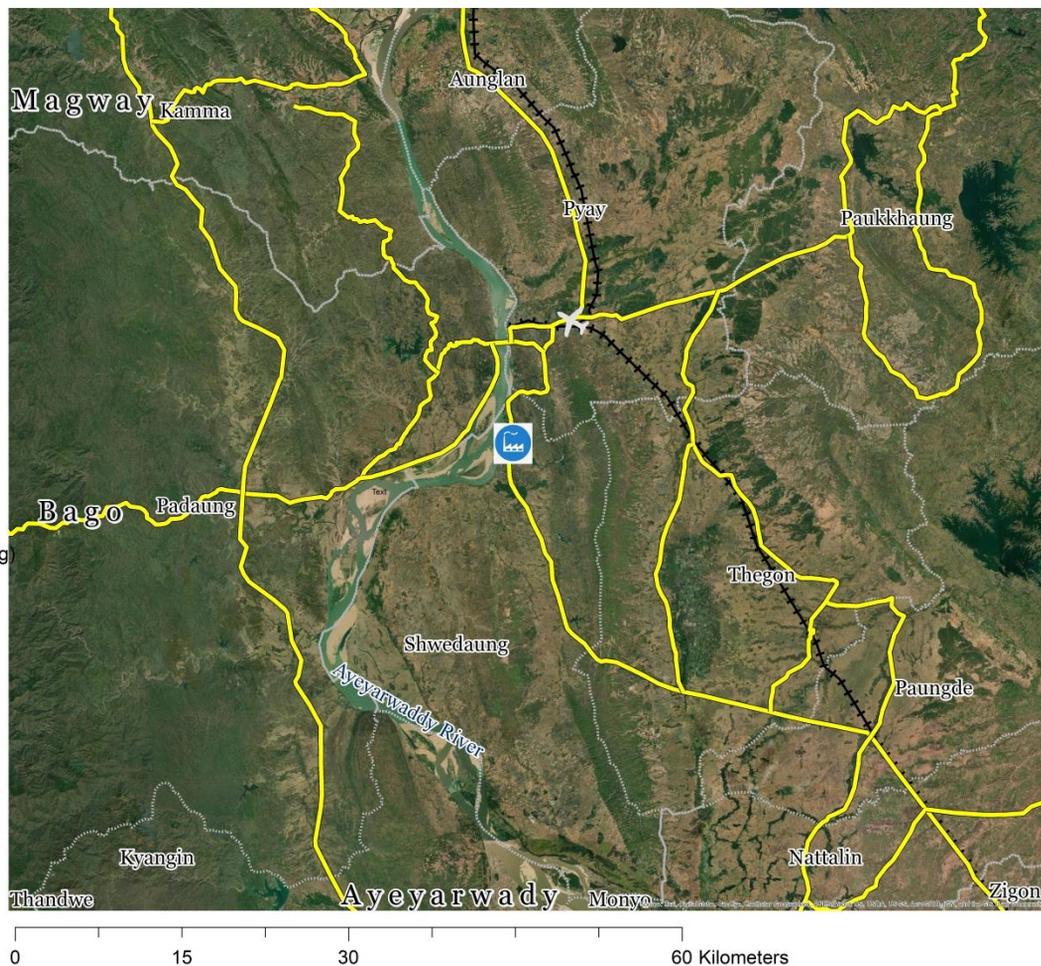

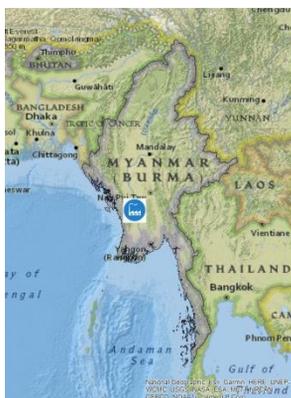

- ✓ A unique textile factory in Myanmar that can operate along the whole supply chain (from cotton fiber to finished fabrics).
- ✓ The factory is conveniently located within the cotton plantation areas of Myanmar (Aunglan, Wethtikan and Paukkhaung) with an abundance of cotton supply.
- ✓ Shwedaung, the most famous city in Myanmar for its traditional textile design and products, offers skilled and experienced personnel for textile sector.
- ✓ Over 600 acres of factory compound with access to electricity and water supply is also suitable for a textile industrial park or textile institute in the future.
- ✓ The compound is suitable to be used for the development of cultural industries due to its proximity to Sri kestra (Tharay-Khit-taya), one of the world heritage sites (11.3 km away).

**Legend**

 Spinning, Weaving and Finishing Factory (Shwedaung)

 Industrial Zone

 Airport

 Highway

 Railway

 Township

Location	Sagaing Township, Sagaing Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	Commercial operation commenced in 1972. The machines are regularly maintained and can be used without major repair.

Key Assets

Land Area	356.47 acres
Machines/ Capacity	Spinning Machines (1,632,000 lbs/year) Weaving Machines (2,640,000 yards/year)
No. of Buildings	215 (including 14 industrial buildings and 5 warehouses)
No. of Employees	588
Products	100% Cotton Yarn , Polyester Blended Yarn and Grey Fabric (Bandage, Gauze)

Infrastructure

Electricity	<ul style="list-style-type: none"> 33 kV line from the Ohndaw Substation Transformers: 6000 kVA (1) unit, 1300 kVA (2) units, 750 kVA (1) unit, 500 kVA (2) units, 400 kVA (3) units, 100 kVA (1) unit
Water Resource	Supply from the Ayeyarwaddy River
Transportation	Close to the Sagaing-Monywa Highway, collocated next to the Sagaing-Monywa Railway and the Ayeyawaddy River

Key Features

The factory can be further extended into the whole textile supply chain from cotton fiber to fabric as:

- ✓ it is strategically located at the heart of textile sector in Myanmar and close to the textile hubs such as Amarapura (37 km), Mandalay (51 km) and Monywa (110 km);
- ✓ it is well connected with the whole of Myanmar and neighboring countries by means of highways (Mandalay-Muse-Shweli to the China Border, Mandalay-Monywa-Tamu to the India Border and the Mandalay-Myitkyina Highway) and also with the Mandalay-Myitkyina Railway and the Ayeyarwaddy River;
- ✓ it has access to infrastructure (land and buildings) and utilities (electricity and water); and
- ✓ the Garment Factory (Sagaing), with 261.92 acres of land, and the Cotton Ginning Factory (Sagaing), with 1.95 acres, are also located in the same township.

Key Features

- ✓ Thabaung can easily access the international waterway as it is located on the east bank of Ngawun River and 263 km away from Thilawa international port, Yangon and 613 km away from Kyaukphyu deep sea port, the Rakhine State.
- ✓ The factory has access to infrastructure (land and buildings) and utilities (electricity and water).
- ✓ Thabaung High Grade Paper Mill (over 1,100 acres of land) is situated beside the Thabaung Newsprint Paper Mill and therefore there is an opportunity for investors to establish integrated paper mills.

Legend

-  Newsprint Paper Mill (Thabaung)
-  Industrial Zone
-  Airport
-  Highway
-  Railway
-  Township

Location	Minsu Village, Kyaukse Township, Mandalay Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	Commercial production commenced in 2006. The machines are regularly maintained and can be used without major repair.

Key Assets

Land Area	27.01 acres (including factory area of 22.42 acres)
Machines/ Capacity	Plastic Production Lines (150,000 pieces/year) Kitchen Ware & Furniture Production Lines (6,018,000 pieces/year)
No of Buildings	23 (including 5 industrial buildings)
No of Employees	212
Products	Home Utensil Stainless Steel Ware, Nursing Station Units, Hospital Furniture and Plastic Products

Infrastructure

Electricity	33 kV line from the Inngone Substation Transformer: 3,000 kVA (1) unit
Water Resource	Ø 4" tube well (2) units
Transportation	Close to the Yangon-Mandalay Highway and the Yangon-Mandalay Railway

Key Features

- ✓ It is the largest factory in Myanmar producing utensil stainless steel products.
- ✓ The property is well located near the region's infrastructure via the Yangon-Mandalay Highway and the Yangon-Mandalay Railway.
- ✓ It has access to infrastructure (land and buildings) and utilities (electricity and water).

 Railway

 Township

Location	Pyay Township, Bago Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.

Key Assets

Land Area	2.82 acres
Machines/ Capacity	Single Roller Gin (54 lbs/hour) (14) units Double Roller Gin (288 lbs/hour) (8) units
No. of Buildings	29 (including 6 industrial buildings and 5 warehouses)

Infrastructure

Electricity	Connected to Pyay Electricity Supply Enterprise Transformer: 100 kVA (1) unit
Water Resource	Ø 2" tube well (1) unit
Transportation	Close to the No. 2 Yangon-Mandalay Highway and the Yangon-Pyay Railway

Key Features

- ✓ The commercial operation commenced in 1972 and production expanded in 2005 with the installation of double roller gin machines.
- ✓ The supply of raw material is reliable as the factory is close to the key cotton plantation areas in Myanmar – Aunglan, Wethtikan and Paukhaung.
- ✓ The Spinning, Weaving & Finishing Factory (Shwedaung), the main downstream industry of the ginning factories in Pyay area, is situated about 16 km away from the factory.
- ✓ It has access to infrastructure (land and buildings) and utilities (electricity and water).
- ✓ It is located in Pyay, close to the No.2 Yangon-Mandalay Highway, and is connected to other major cities by means of the Yangon-Pyay Railway and the Ayeyarwaddy River.
- ✓ The double roller gin machines are in good operating condition.

Legend

-  Ginning Factory (Yamethin)
-  Industrial Zone
-  Airport
-  Highway
-  Railway
-  Township

Location	Insein Township, Yangon Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	The factory was established in 1958. It received ISO 9001:2015 certificates for pharmaceutical production and sales in 2018 and is currently preparing for ISO 17025:2017 accreditation on quality control laboratory. Currently, it produces 193 different pharmaceutical items in compliance with good manufacturing practice.

Key Assets

Land Area	120.871 acres (including factory area of 83.811 acres)
Machines/ Capacity	Tablet & Capsule Production Plant-1 (400 millions/year) Tablet & Capsule Production Plant-2 (400 millions/year) Oral liquid production plant (400,000 Litres/year) Ointment Production plant (50,000 kg/year) Powder Production plant (400,000 kg/year) Snake Anti-Venom Production Plant (120,000 doses/year) Tetanus Production Plant (500,000 doses/year) Small Volume Parenteral Solution Plant- 1 (7 millions/year) Small Volume Parenteral Solution Plant- 2 (17 millions/year) Large Volume Parenteral Solution Plant (2.4 millions/year) Cephalosporin Production Plant (4 millions/year)
No. of Buildings	184 (including 119 industrial buildings and 22 warehouses)
No. of Employees	1,371
Products	Tablets and Capsules, Small Volume Parenteral Solution, Large Volume Parenteral Solution, Powder, Ointment, Oral Liquid, Vaccines; Anti-serum and many other products

Infrastructure

Electricity	<ul style="list-style-type: none"> 10 MVA Substation (66/11) Transformers: 1250 kVA (2) units, 1000 kVA (9) units, 800 kVA (3) units, 500 kVA (2) units, 315 kVA (1) unit, 300 kVA (1) unit, 100 kVA (1) unit
Natural Gas	Connected with Ø 4" gas pipeline from Thamine Gas Station
Water Resource	Ø 10" tube well (2) units, Ø 8" tube well (3) units

- ✓ The factory was one of the first manufacturers of pharmaceutical tablets and capsules under the brand name “BPI”, a well known and cost effective pharmaceutical brand in Myanmar.
- ✓ A factory with future market potential due to rising local demand which has been fulfilled by imported pharmaceuticals.
- ✓ The property is conveniently located in the Yangon Region, the industrial and commercial center of Myanmar.
- ✓ The brand image of BPI and its production process are regarded for being in compliance with good manufacturing practice.
- ✓ It has access to building management system, infrastructure (land and buildings) and utilities (electricity and water).

- Pharmaceutical Factory (Insein)
- Industrial Zone
- Airport
- Highway
- Railway
- Township

Location	Close to Hanmyintmo Village, Kyaukse Township, Mandalay Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	Commercial operation commenced in 2008. The factory was awarded ISO 9001:2015 certificate for production and sales of pharmaceutical products in 2019. Currently, 43 varieties of products are produced in compliance with good manufacturing practice.

Key Assets

Land Area	31.57 acres (including factory area of 22.76 acres)
Machines/ Capacity	Disposable Syringe Production Plant: (7.5 millions/ year) Large Volume Parenteral Solution Plant -1: (2 million bottles/year) Large Volume Parenteral Solution Plant -2: (8 million bottles/year) Small Volume Parenteral Solution Plant -1: (26 millions/ year) Small Volume Parenteral Solution Plant -2: (7.8 millions/year) Ointment Production Plant: (1.2 millions/year) Powder Production Plant: (32000 kg/year)
No. of Buildings	59 (including 34 industrial buildings and 7 warehouses)
No. of Employees	378
Products	Disposable Syringe, Large Volume Parenteral Solution, Small Volume Parenteral Solution, Betalactamic, Ophthalmic, Oral Powder, Liquid and many other products

Infrastructure

Electricity	<ul style="list-style-type: none"> Substation (1) : 3 MVA (33/11 kV), 2 MVA (33/0.4 kV), 1 MVA (11/0.4 kV), 50 kVA (11/0.4 kV) Substation (2) : 2 MVA (33/0.4 kV) Substation (3) : 315 kVA (33/0.4 kV)
Water Resource	Ø 10" tube well (5) units, Ø 8" tube well (2) units

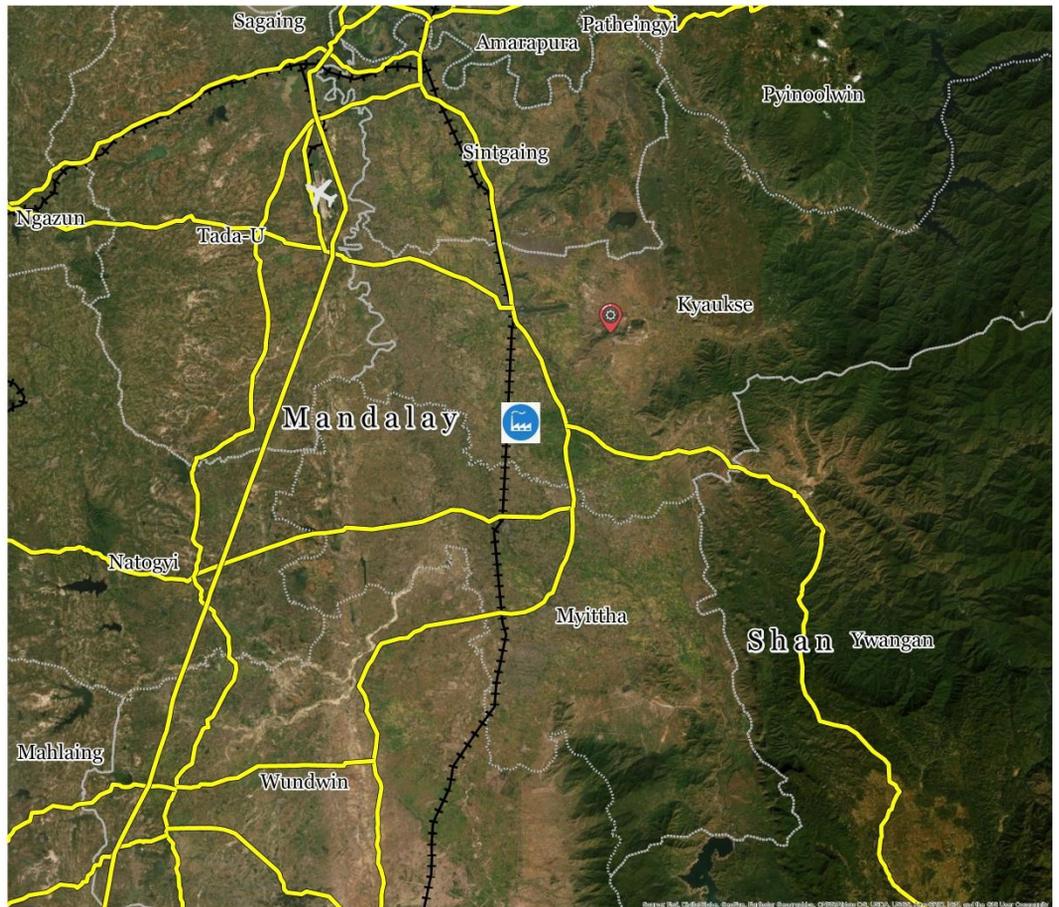

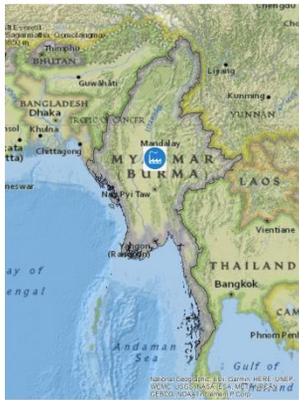

- ✓ The factory was one of the first manufacturers of pharmaceutical disposable syringe and injection/infusion under the brand named BPI, a well known and cost effective pharmaceutical brand in Myanmar.
- ✓ A factory with future market potential due to rising local demand which has been fulfilled by imported pharmaceuticals.
- ✓ The location of the factory is close to the Yangon-Mandalay Highway and approximately 60 km away from Mandalay, the economic city of Myanmar.
- ✓ Well built factory with good machines, building management system and access to utilities (electricity, steam and water).

**Legend**

-  Pharmaceutical Factory (Inyaung)
-  Industrial Zone
-  Airport
-  Highway
-  Railway
-  Township

Location	Hlegu Township, Yangon Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	Established as a turnkey project by Chiel Jedang Company (Korea) with the supervision of Samsung Corporation in 2002. Commercial production commenced in 2007. Currently, Recombinant Hepatitis B Vaccine adult dose and child dose are produced in compliance with good manufacturing practice.

Key Assets

Land Area	29.75 acres
Machines/ Capacity	Hepatitis B Vaccine Plant (300,000 doses/year)
No. of Buildings	10 (including 8 industrial buildings)
No. of Employees	73
Products	LIVOVAX-B Hepatitis B Vaccine Recombinant (Adult Single Dose-1.0 ml and Child Single Dose-0.5 ml)

Infrastructure

Electricity	<ul style="list-style-type: none"> Connected to the East Dagon Substation Transformer: 1000 kVA (1) unit
Natural Gas	Ø 4" gas pipeline from the Ywama Gas Station.
Water Resource	Ø 8" tube well, Ø 6" tube well, Ø 4" tube well

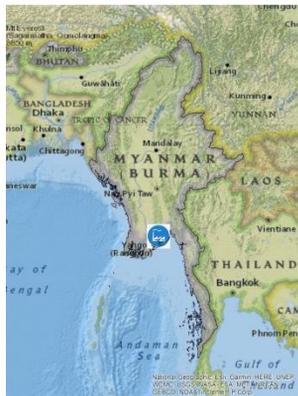

- ✓ The factory uses Korean Vaccine Production Technology and complies with good manufacturing practice.
- ✓ Hepatitis B vaccine has high demand in Myanmar due to the high prevalence rate of Hepatitis B (6.5% of population in 2015).
- ✓ The location is ideal for vaccine manufacturing and well connected with the rest of Yangon as it is situated at the junction of the No. 7 Highway and the Khayebin Road.
- ✓ It is well equipped with infrastructure (land and building) and access to utilities (electricity, gas and water). There is capacity to extend the facility to produce other vaccine products.

Township

Location	Hmawbi Township, Yangon Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	The site was used for herbal plantation to produce pharmaceutical raw materials for traditional medicines. The machines are no longer in existence.

Key Assets & Infrastructure

Land Area	18.64 acres
No. of Buildings	2
Electricity	<ul style="list-style-type: none"> • 33 kV line from the Myaungtagar Substation • Transformer: 50 kVA (1) unit
Natural Gas	Connected to the Hmawbi Gas Station
Water resources	Ø 8" tube well (1) unit

Key Features

The site can be used for other commercial purposes as:

- ✓ it has access to infrastructure and utilities (electricity, gas and water);
- ✓ it is located 47 km away from Yangon, the commercial city of Myanmar, through which it can be connected to the other parts of Myanmar and to the other countries as well; and
- ✓ it is collocated next to the Yangon-Pyay Highway and close to the Yangon-Mandalay Expressway.

Legend

-  Pharmaceutical Ingredient Factory (Hmawbi)
-  Industrial Zone
-  Airport
-  Highway
-  Railway
-  Township

Location	Daik-U Township, Bago Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	Production of Tapioca Starch commenced in 1999, utilizing Japanese technology. It is currently planning to produce methylated spirits.

Key Assets

Land Area	3566.18 acres (including factory area of 170.48 acres)
Machines/ Capacity	Tapioca Starch Production Line (1,200 Tons/year) Methylated Spirit Production Line (700,000 Litres/year)
No. of Buildings	61 (including 6 industrial buildings and 4 warehouses)
No. of Employees	50
Products	Tapioca Starch and Methylated Spirit

Infrastructure

Electricity	<ul style="list-style-type: none"> Connected to the Ayethukha Substation Transformers: 1250 kVA, 750 kVA, 300 kVA, 100 kVA
Water Resource	Ø 2" tube well and supply from the Pyinbongyi Dam
Transportation	Close to the Yangon-Mandalay Highway

Key Features

- ✓ Over 3500 acres of land has the capacity to be used for a variety of purposes – industrial, commercial or agricultural.
- ✓ The factory can access other major cities (Yangon and Bago) due to its location along the Yangon-Mandalay Highway and the Hanthawaddy International Airport project.

-  Township

0 15 30 60 Kilometers

Location	Seikphyu Township, Magway Region, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	Commercial production commenced in 2001 with the plantation of beleric myrobalan trees to produce cooking oil from beleric myrobalan seeds.

Key Assets

Land Area	24.69 acres
No. of Buildings	18 (including 8 industrial buildings and 2 warehouses)
Machines	3 (repair may need before operation)
No. of Employees	2

Infrastructure

Electricity	Supply from the Seikphyu Substation
Water Resource	Ø 4" tube well (1) unit
Transportation	Collocated next to the Seikphyu-Saw Highway and close to the Ayeyarwaddy River

Key Features

- ✓ The site is located in the middle of Myanmar (a key oil seed crop plantation area) and connected to major cities nearby, by means of the Seikphyu-Saw Highway. Therefore, it could be used for other purposes (such as oil mill and logistics warehouse).
- ✓ It has infrastructure (land 24.7 acres), access to utilities (electricity and water) and could be moved into other value-added productions.

0 15 30 60 Kilometers

Location	Innshae Village, Thaton Township, Mon State, Myanmar.
Owner	Ministry of Industry, The Government of the Republic of the Union of Myanmar.
Background	In 2016, the Government of Myanmar decided to implement Thaton Industrial Park. The whole area (over 650 acres) is available for all types of industrial zones (such as Textile Manufacturing Zone or Rubber Based Products Manufacturing Zone).

Key Assets

Land Area	677.77 acres
No of Buildings	36 (including 6 warehouses).
No of Employees	156

Infrastructure

Electricity	<ul style="list-style-type: none"> • 66 kV transmission line • Thaton gas turbine • Transformers: 25 MVA (2) units, 10 MVA (2) units
Water resource	Supply from the Kyauksarik Stream
Transportation	Close to the Asian Highway 1 (AH-1) and the Yangon-Mawlamyine-Myeik Highway

Key Features

- ✓ The industrial park enjoys its prime location on the Asian highway 1 (AH-1).
- ✓ It has the potential to become a future trading zone in Myanmar due to its optimal location near Myawaddy trade center on the Thai-Myanmar border, the Ye container port (223 km) and the Dawei deep sea port (383 km).
- ✓ Convenient access to other major cities of Myanmar – Yangon, Mawlamyaing and Hpa-an.
- ✓ It has access to infrastructure (land and buildings) and utilities (electricity and water).
- ✓ Skilled and experienced local workers can be available.
